

## Velora (Streamlit Interface)

Upload data

Configure parameters

Run/reopen scenarios

Compare solutions

Export & reports

### 1 INPUT DATA

Station demand  
(OD flows)

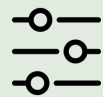

LTS network  
(LTS 1-4)

Content layers  
(optional)

Network cleaning

LTS assignment  
(link-level)

Impedance &  
cost computation

Decision variables  
(station, links)

Multi-objective  
optimization

Pareto-efficient  
solutions

Maps (stations,  
coverage, network)

KPIs (demand, cost,  
emissions, etc.)

Scenario evaluation  
(Pareto front)

Reports & exports  
(city-ready planning)

### Persistent Analytical Backend

Database (PostgreSQL + PostGIS) + Scenario Storage + Results & logs
